

Manage InDesign projects with ease!
Automatically track, organize and preflight your fonts and digital assets

Include Fonts in Your InDesign Project Workflows

TypeTrax™ manages Adobe InDesign CS4 project workflows and associated fonts with Cumulus 8, Canto's industry-leading digital asset manager, and FontAgent® Pro, the world's smartest font manager. Just drag an InDesign project folder into Cumulus and TypeTrax automatically imports all the fonts and files required by the project into the asset manager.

Fully Integrated Project, Asset and Font Management Solution

After cataloging your InDesign projects, you can:

- View native fonts and metadata with a few clicks from within Cumulus
- Check out documents and package them automatically to include required fonts, images and resources
- Verify that you have the precise fonts you need—not just ones that are similar or named like the ones you need
- Auto-activate and manage fonts using FontAgent Pro
- Track all checked-in revisions to the InDesign project
- Revert to earlier versions of a project easily

TypeTrax garnered Best of Show honors at Macworld Expo for its ability to manage all digital assets, including fonts, images, licensing and usage information for InDesign projects

TypeTrax System Requirements

TypeTrax runs in the Canto Cumulus client-server environment. You must have a server running Cumulus 8.0 or 8.1. Client installations require:

- Apple Macintosh running Mac OS X 10.4.11 (Tiger) or later
- Adobe InDesign Creative Suite 4
- Access to a server running Canto Cumulus 8.0 or 8.1

Every TypeTrax client includes a license for FontAgent Pro 4 for Mac OS X.

Get Started with TypeTrax Today

A TypeTrax server license has a suggested retail price of USD \$1,995 and includes three user licenses. Additional user licenses cost \$195 each.

TypeTrax is available for purchase from Insider, Moksa, Canto and selected Canto resellers worldwide. To gain effective, reliable control of your InDesign projects, contact us now.
